

INTRODUCTION

Erlson Precision Components

Why should you work with us?

Our pledge to you, as our valued customer, is to be the strongest link in your supply chain.

Erlson Precision Components is a specialist manufacturer of small, highly engineered components and assemblies requiring the

tightest dimensional tolerances for a range of demanding automotive and general industrial applications, in medium to high volume.

Other similarly demanding applications are equally catered for, including small, precision machined components for engine, fuel, delivery, break line, fluid power and other specialist off-highway and industrial applications where tolerance and quality requirements are critical to end performance demands.

YOUR PRECISION MANUFACTURING PARTNER

Turbochargers

Full automotive IATF16949 & ISO 14001 accreditation.
Technology and expertise to deliver high quality machined components to sub 5 micron tolerances.

Fuel Cell Compressors

By utilising our Shafts and Compressor wheels for Fuel Cell Compressors we have partnered with a UK based company to produce 10Kw to 45Kw Fuel Cell Compressor components.

High Speed Motors

We have had continued success in manufacturing Hydraulic Pistons for Off Highway Hydraulic Motors. With the help of Value Engineering we can successfully reduce costs and improve the value of our components.

Heat Pumps

Heat pumps for Electrical Vehicles and Industrial Heat Pumps for HVAC. Our portfolio of compressor wheels, shafts and impellers allows us to supply our product into OEM and Tier 1 supply chains.
